

To achieve this vision, the Back Youth Alliance is calling for...

Agenda for action

A targeted youth development offer for the most marginalised and at-risk young people, consisting of access to personalised support from a named youth worker, advocacy and support to navigate statutory services, and a comprehensive package of accessible out of school and holiday activities.

A National Youth Offer that includes:

A universal youth work and enrichment offer, giving all young people regular access to positive activities, programmes and clubs, enrichment and non-formal learning activities, outdoor learning and trips away from home, volunteering and social action opportunities. This is enabled by national guidance, cross-sector collaboration, and bursaries for young people from low income households and/or with additional needs.

Youth voice and representation at all levels of policy and decision making: opportunities for young people and youth-led organisations to meaningfully participate in the design and delivery of policy and services that impact young people, including through policy networks and fora, an active and influential British Youth Parliament, and local youth partnerships.
